What the package does and does not cover

Who this edition is for Travelers using an ordinary passport from one of the five named markets, applying from outside the destination, and planning short tourist visits to one or more of the ten named destinations.

What is outside the scope Other passport nationalities and destinations; emergency, temporary, diplomatic, official, refugee and other special travel documents; work, study, residence, immigration, citizenship and individual admissibility assessments. Non-British-citizen UK nationality categories are not included. Transit countries outside the ten destinations need separate research.

Does covered mean I need an eVisa? No. A traveler may qualify for an exemption, visa on arrival, another authorization, or a different route. Chapters flag relevant distinctions, and individual history or status can change the answer.

Does the purchase include a visa or government fees? No. This is an independent educational publication. It does not submit an application, issue a visa, provide government support, or guarantee approval or entry.

Is every rule guaranteed to remain current? No. Edition 1.0 records research on 21 September 2026. Official links and source codes help you recheck. Purchase of this edition does not by itself promise future updates or personal support.

Before you purchase: match both your passport and destination to the table on page 1. If either is absent, this edition does not provide a destination chapter for your combination.
